

LR21 – POST-LAUNCH LP ADD CHECKLIST (SCREENSHOTS STYLE)

Decision Check (Before Opening DEX)

- 1 Market cap \geq 15–20 BNB
- 2 No panic selling in last 6–12 hours
- 3 Holder count increasing
- 4 Community informed before LP add

Step 1: Pre-Announcement

Post announcement in Telegram stating LP will be added at market price and locked. Wait 5–10 minutes before proceeding.

Step 2: Open Add Liquidity Page

- 1 Open PancakeSwap \rightarrow Liquidity \rightarrow Add Liquidity
- 2 Select LR21 / BNB pair
- 3 Verify correct LR21 contract address

Step 3: Enter BNB Amount Only

- 1 Enter 0.5 BNB (LP Add #1) OR 1.0 BNB (LP Add #2)
- 2 Do NOT manually enter token amount
- 3 Allow DEX to auto-calculate LR21 amount

Step 4: Ratio Verification

- 1 Check price and pool share section
- 2 Confirm no extreme price movement is shown
- 3 Cancel if values look abnormal

Step 5: Confirm Liquidity Addition

- 1 Click Supply
- 2 Review transaction summary
- 3 Confirm wallet transaction
- 4 Copy transaction hash

Step 6: Lock LP Tokens

- 1 Open LP lock platform (Four.meme / PinkLock / Mudra)
- 2 Lock 100% of newly received LP tokens
- 3 LP Add #1 lock: 540 days
- 4 LP Add #2 lock: 720 days

Step 7: Post-Add Announcement

Post confirmation message with transaction hash in Telegram and pin it for 24 hours. Share update on Twitter (X).

Final Verification

- 1 Liquidity increase visible on DexScreener
- 2 LP lock visible on scanner
- 3 No contract changes made
- 4 Community feedback remains positive

Absolute Rules

- 1 Never add liquidity silently
- 2 Never remove or unlock liquidity early
- 3 Never add taxes or mint new tokens
- 4 Never add LP during panic selling
